

SPEAKER BARRETT: LR 283 is adopted. LR 284.

CLERK: Mr. President, 284 was offered by Senator Wesely. It is found on page 876. (Read brief explanation.) Again, Mr. President, the resolution is offered by Senators Wesely, Baack, Weihing, Scofield, and Haberman.

SPEAKER BARRETT. Senator Wesely, please.

SENATOR WESELY: Thank you, Mr. Speaker, members. I am pleased to co-sponsor this resolution with my colleagues from the western area of the state. Senators Baack, Scofield, Weihing and Haberman are the closest to Colorado and Colorado is in the running as one of the seven finalist states for the Superconducting Super Collider project which you have probably read about. It is a very major investment by our federal government in this research and technological development project. At first, Governor Orr had endorsed South Dakota along with some other states in the Midwest but they have dropped out of the running and Colorado is now in the finalist stage, and we are very much in cooperation with Colorado. The university's physics and astronomy departments have been working with Colorado as they prepare their proposal, and look to if the project is brought to Colorado to have a linkage with them. So that is where my interest comes from and, of course, if there is a major project like that out in Colorado, the bordering areas of Nebraska will benefit as well, and so the whole state, I think, would benefit seeing that project come to Colorado, and this resolution would endorse that. So I would move for its adoption.

SPEAKER BARRETT: Thank you. Any discussion on the Wesely motion? If not, all in favor of adoption of the resolution please vote aye, opposed nay. Have you all voted? Record, please.

CLERK: 26 ayes, 0 nays, Mr. President, on adoption of the resolution.

SPEAKER BARRETT: LR 284 is adopted. LR 285.

CLERK: Mr. President, LR 285 offered by Senator Rod Johnson. It is found on page 878. (Read brief explanation.)
